

SoftPuzzle PM

Software Requirements Specification (Sample)

Project: ACME Portal Build | Version: v1.0 | Page 1 of 3

1. Overview

This document is a sample 3-page PDF used to verify the in-app preview (iframe) feature of the requirements deliverable slot.

2. Scope

- Approval / confirmation workflow between client and agency
- Deliverable slots: requirements, IA, design, prototype, figma
- Soft gates (5, 7, 9, 11, 13) + major gates (5, 18)

3. Functional Requirements (Page 2 of 3)

- REQ-PRJ-001 Create project and initialize workspace.
- REQ-REQ-001 Upload requirements file as versioned snapshot.
- REQ-WF-001 Request review; slot locks while pending.
- REQ-WF-003 Client confirms or rejects a deliverable version.
- REQ-WF-005 New version after confirm auto-invalidates prior.
- REQ-DSN-004 Figma handoff registered and confirmed (Gate 13).
- REQ-DEV-001 Dev trigger requires gates 5,7,9,11,13 passed.
- REQ-TST-001 Test cases linked bidirectionally with defects.
- REQ-CMT-001 Per-version comments with role badges.

4. Non-Functional Requirements (Page 3 of 3)

NFR-001 Desktop 1280px+ baseline; mobile out of MVP scope.

NFR-002 File upload limit 50MB per asset.

NFR-003 Session auth; CSRF protected mutations.

NFR-004 Audit log retains workflow events permanently.

5. Appendix

20-step flow: 1 init / 2-5 requirements / 6-13 design /
14 dev / 15-18 test / 19-20 transition & launch.

Milestones M1..M8 (M5 = Figma confirmed, Gate 13).
